Color-Gard+

ARCHITECTURAL ROOF COATING SYSTEM

THE COMPLETE ARCHITECTURAL COLOR + WATERPROOFING ROOF RESTORATION SYSTEM

www.americanweatherstar.com

American WEATHERSTAR®

AN ARCHITECTURAL METAL ROOF COATING SOLUTION

The Color-Gard+ Architectural Roof Coating System combines our innovative High-Gloss Acrylic 215 with the superior elongation, tensile strength, and color retention of High-Tensile Acrylic 211. This highly-advanced coating system provides metal roof surfaces with a beautiful, high-build, architectural finish and contributes unsurpassed weatherability, abrasion-resistance, colorfastness, and resistance to dirt pick-up.

The Color-Gard+ System is especially engineered to seal, waterproof, and protect aged metal roofs from the harmful effects of the sun, wind, and rain. The system's main components, High-Tensile Acrylic 211 and High-Gloss Acrylic 215, combine to provide metal roof surfaces with a high-performance, low-build, aesthetic finish. The system is designed for metal roofs affected by moderate levels of rust and corrosion with positive drainage.

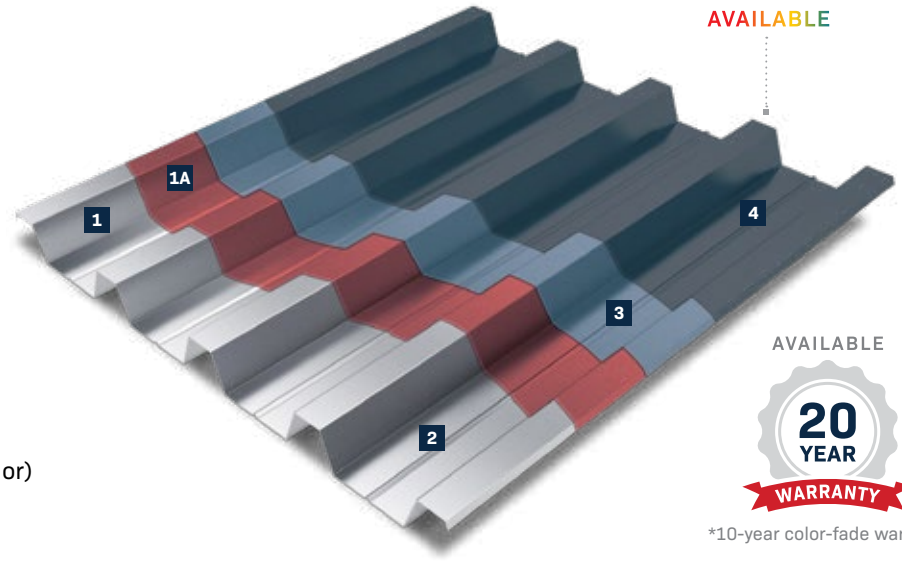
FEATURES/BENEFITS

- Stops leaks and vastly improves performance
- Provides a beautiful, long-lasting, architectural finish
- Substantially reduces maintenance
- Extends service life by restoring the existing metal roof surface
- Superior elongation, tensile strength, and color-retention
- Cures to form a seamless, watertight membrane
- Eliminates the onset of rust and corrosion
- Long-term warranty options available
- 10-year color-fade warranty
- Minimal interruption to business

SUITABLE SUBSTRATES

- Metal

CUSTOM COLORS AVAILABLE



1 Metal roof substrate

1A Red Oxide Rust Prime 912

2 Terminator 622

3 High-Tensile Acrylic 211 (custom color)

4 High-Gloss Acrylic 215

AVAILABLE

20 YEAR WARRANTY

*10-year color-fade warranty

APPLICATION PROCESS

SURFACE PREPARATION: To ensure optimal adhesion, the roof is pressure washed to remove all dirt, dust, and debris. In some cases, a primer application (1A) of Red Oxide Rust Prime 912 may be necessary.

1

SEAMS/DETAILS: All seams and flashing details are coated with Terminator 622 a thick "rubber-like" mastic to help withstand the expansion and contraction of the roof structure.

2

HIGH-TENSILE ACRYLIC 211: A base coat of High-Tensile Acrylic 211 provides excellent color retention and delivers maximum adhesion to metal roof substrates .

3

HIGH-GLOSS ACRYLIC 215: A top coat of High-Gloss Acrylic 215 provides a flexible, low-build, and aesthetic finish with unsurpassed weatherability, abrasion resistance, and colorfastness.
